Saint-Martial Fountain (A)

According to oral tradition, the fountain of Saint-Martial sprang from the stick carried by St Martial. This Saint went from Tulle to Uzerche and met a woman in Espartignac carrying water drawn from above. Saint-Martial is said to have asked her for some of her water to quench his thirst, but she continued on her way, ignoring him. The disgruntled travelling saint hit the ground with his stick where a spring gushes out to this day. This fountain is said to have been known to cure scabies.
